MAP Technology Solutions
Capabilities Statement

Core Competencies

M.A.P. Technology Solutions is a full-service IT consulting firm with over 30 years of experience helping organizations modernize, secure, and optimize their information technology environments.

Core competencies include:

IBM i (AS400) & System 36 Modernization

- IBM i (AS400) consulting, administration, and application support
- System 36 migrations to native IBM i programs and files

Oracle/JD Edwards ERP Services

- JD Edwards (Oracle) ERP support, configuration, and database management on IBM i and related platforms
- Database list preparation and data readiness for ERP conversions

Enterprise Data & Cloud Solutions

- Private cloud hosting, backups, colocation, and disaster recovery
- Data security and availability for mission-critical systems

EDI & Integration Services

- EDI design, mapping, and support for shipping, logistics, and financial transactions

Microsoft SQL Server & BI

- SQL Server administration, data migration, SSRS reporting, and BI tools

IT Staffing & Talent Solutions

- Contract, contract-to-hire, staff augmentation, and direct placement of IT professionals

MAP Technology Solutions
Capabilities Statement

Past Performance

American Water – Data Center Relocation

- Planned and executed relocation of enterprise data center, ensuring continuity of IBM i and JD Edwards environments
- Delivered on schedule with zero unplanned downtime; supported enterprise applications and 500+ users

American Water – JD Edwards & AS400 Support

- Ongoing functional and technical support for JD Edwards ERP and AS400 systems
- Improved system stability and response times while supporting multi-site operations

American Water – IDA to SQL Server Migration

- Migrated IDA data from AS400 to Microsoft SQL Server to enable advanced reporting and analytics
- Reduced reporting cycle time and enhanced data accessibility for business users

Deloitte – Oracle JDE / AS400 Conversion Support

- Prepared Oracle JD Edwards database lists and data sets for Deloitte's AS400 conversion project
- Enabled accurate, timely conversion of legacy data for large-scale ERP transition

National Electronic Transit / Ricoh – EDI Services

- Provided EDI services to support Ricoh shipping operations
- Improved transaction accuracy and reduced manual processing for inbound/outbound shipments

---

Differentiators

- **Deep Legacy & Modern Stack Expertise** – Rare combination of IBM i / AS400, System 36, and Oracle/JD Edwards experience, plus modern SQL Server and BI capabilities
- **Process Optimization Mindset** – Focus on improving uptime, data quality, and workflow efficiency—not just maintaining systems
- **Broad, Vetted IT Talent Network** – Proven ability to rapidly source and place specialized IT professionals who stay and perform
- **Customer-Aligned Engagements** – Thorough vetting of customer needs before search or project start, resulting in lower turnover and better fit
- **Cost-Effective, Scalable Solutions** – Industry-competitive pricing and scalable teams that align to project scope and budget
